## Warming churches

### **HASSOCKS WITH SKAI – 20 MM COMPOSITE FOAM**

#### **TOTAL THICKNESS 25MM**

- MATERIAL:** faux leather (Skai) with superior, stretch knit fabric;  
with flame-retardant finish in accordance with DIN 4102; permeable to air;  
hard-wearing; light-fast; easy-care
- Fabric weight:** 1010 g/m, thickness 12/10 mm +/-0.5 mm
- Shade:** acc. to colour chart
- Material:** 20 mm composite foam, density 140 kg/m<sup>3</sup>,  
4 mm MDF board
- Production method:** the composite foam and MDF board are bonded together; the faux leather cover is pressed in a special process and stretched across and stapled to the MDF board.
- Hassocks are attached** with special-purpose double-sided adhesive tape or Velcro tape
- Characteristics:** causes no damage to kneelers, no deformation of the upholstery;  
non-wrinkle
- Made-to-measure:** The upholstery is made to measure **exactly** for each individual pew; corners, curves, diagonal edges and recesses are finished individually.  
(upholstery length up to 2.80 in a single piece)

**Warranty 10-year warranty on all the upholstery**
