

THERMOWAND

HEATED SCREENS

TW 20.12

Areas of application:

Heated screens that heat up fast and are versatile to use in almost any area, where comfortable warmth is required, e.g. chancel, for organists, choir, soloists, vestry etc. / ready to connect.

Remarks:

Placing several heated screens next to each other will form a pleasant “curtain of heat”, for example for orchestras or concert musicians: enquire about custom orders.

Technical specifications: 1 side or centre section

Operating voltage	230V / 50 Hz
Output	300W at 230V 50 Hz
Power consumption	1.3 A
IP rating	50 / protection class I
Permissible ambient temperature	-20° C to +25° C
Wiring	1,0 m silicone cable incl. Plug with switch and indicator light
Weight	side section approx. 13kg- centre section approx. 17 kg
Housing	Frame housing varnished oak frame (see figure)
Dimensions of centre section	width 44 cm, depth 24 cm, height 137 cm
Dimension of side section	width 44 cm, depth 24 cm, height 122 cm
